# Clinical Endocrinology And Diabetes At A Glance

## **Synopsis**

Recognising a need to promote and enhance teaching of clinical endocrinology and diabetes in UK medical schools, the Society for Endocrinology, in collaboration with Diabetes UK and the Association of British Clinical Diabetologists, created a national curriculum that sets out the minimum recommended standards for undergraduate medical education. Clinical Endocrinology and Diabetes at a Glance corresponds to the curriculum and covers all important areas of diabetes and endocrinology in a clinically relevant and concise manner, with complementary figures to ensure principles are explained clearly. It highlights key practical skills for undergraduates in line with the GMC recommendations that medical graduates should be well prepared for their Foundation posts. There is also emphasis on the importance of multidisciplinary teams in the management of endocrine diseases and diabetes. These include sections on structured education programmes, psychosocial aspects, and patient self-management and monitoring. Clinical Endocrinology and Diabetes at a Glance will serve as a valuable resource for medical students and junior doctors treating patients with these conditions.

## **Book Information**

Series: At a Glance

Paperback: 160 pages

Publisher: Wiley-Blackwell; 1 edition (April 17, 2017)

Language: English

ISBN-10: 1119128714

ISBN-13: 978-1119128717

Product Dimensions: 8.3 x 0.5 x 10.7 inches

Shipping Weight: 15.5 ounces (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 1 customer review

## **Customer Reviews**

The market-leading at a Glance series is popular among healthcare students, and newly qualified practitioners for its concise and simple approach and excellent illustrations. Each bite-sized chapter is covered in a double-page spread with clear, easy-to-follow diagrams, supported by succinct explanatory text. Covering a wide range of topics, books in the at a Glance series are ideal as

introductory texts for teaching, learning and revision, and are useful throughout university and beyond. Everything you need to know about Clinical Endocrinology and Diabetes at a Glance! Recognizing a need to promote and enhance teaching of clinical endocrinology and diabetes in UK medical schools, the Society for Endocrinology, in collaboration with Diabetes UK and the Association of British Clinical Diabetologists, created a national curriculum that sets out the minimum recommended standards for undergraduate medical education. Clinical Endocrinology and Diabetes at a Glance corresponds to the curriculum and covers all important areas of diabetes and endocrinology in a clinically relevant and concise manner, with complementary figures to ensure principles are explained clearly. Dr Aled Rees, Consultant Endocrinologist, School of Medicine, Cardiff University Dr Miles Levy, Consultant Endocrinologist, University Hospitals of Leicester Dr Andrew Lansdown, Consultant Endocrinologist, University Hospital of Wales, Cardiff

The at a Glance series, as the name indicates, is for those people already into their clinical studies and for those people who are practitioners in their respective field. The series lends itself, within the vocabulary it uses and in the clinical terms of which people who work in and around the clinical workplace/environment can deal with. The clinician does not necessarily have to be within the field that is being described and explained but within the parameters of clinical good practice et cetera. These books then give healthcare students and other practitioners a good concise pointers, accompanied by a plethora of pictorials and diagrams. Each subheading is designed to be relatively comprehensive and helps the reader comprehend the text at hand, brush up on and an all-around good taste of the subject at hand. These books then are designed as an introduction to a specific discipline of a field of medicine. This particular title, Clinical

Endocrinology, and Diabetes at a Glance provide up-to-date coverage of new developments in best practice - that will improve the understanding of diagnosis and treatment of endocrine and metabolic disorders. The best team led approached basis for diabetic care as well as good practice in self-care including self-monitoring. While not necessarily a lay-friendly book, it is a text well worthy of its target audience.
