Customer Reviews

Conrad Fischer, MD, is director of the residency program at Brookdale University Hospital and Medical Center in New York City and associate professor of physiology, pharmacology, and medicine at Touro College of Osteopathic Medicine in New York City. He teaches USMLE Steps 1, 2, and 3, Internal Medicine Board Review and Attending Recertification, and USMLE Step 1

Physiology.

Its way more disorganized than MASTER THE BOARDS STEP 2CK. Lacks a lot of info. I suggest buy another book to go along with this one.

Seems like just about every other master the boards book. Good information, but it is a review book and doesn't go into great detail much of the time. May need to supplement it for review, but otherwise they haven't failed me yet.

To my knowledge there is no other book to give quick and concise review of all the subject material. I would like to think that 85-95% of what is covered in this book will be touched upon in some form on the exam. I have only began reading it now. However i would like to point something specific i found. In the first chapter which reviews biostats, they talk about being +1 standard deviation above the mean and it sitting at 86th percentile. I think this is wrong, small overlooked error on math. If you add the math up, i believe the correct percentile should be 84. Again, slight error, but if you are reading the book intently and catch small things like this, i would like to think a person is on the right track, hopefully. Again nothing is free of being fallible. Hope Dr. Fischer takes a look at this and lets me/us know if we are correct or if i am missing something? But nice book and i do enjoy the layout of this edition - *note i have not read the previous edition.- I bumped it up from 4 to 5 stars because of the feedback from both Book Support and the authors via personal email messages. I am truly happy and appreciative for the support behind their product. I will endorse it too anyone who ever asks me what i used to study for this exam.

I felt that it did not go into enough detail for step 3, i had a lot of test questions where he may have skimmed the surface of the subject but the answer to the question could not be found in the book. Decent book and the main way to study for step 3 is board practice questions anyway.

Horribly organized. Most of my time is spent flipping pages, looking for information because the index is utterly worthless. I do believe that one day I will lose it and rip all the pages out of this book.

combined with uworld. definitely not all encompassing. good tips about ccs though

highly recommended for reviews

Good book
