The Big Book Of Fibery Rainbows: Creating And Working With Multi Colored Fibers And Palettes

Synopsis

"the subject matter stays focused on frame of mind and experimentation which will ultimately create artists instead of followers... Loaded with easy to read how-toâ€™s and step by step descriptions of the many different methods to creating unique color ways, Rainbows will teach you plenty while making you feel like you discovered it all on your own! It truly is the treasure at the end of the rainbow." Lexi Boeger. Once upon a time.. we fell in love, with color, with fiber, and with all the fibery goodness we could create when we put them together. Suzy and Arlene have been doing just that, playing with colors and different ways to blend, prepare, and spin fiber! Inside this book you will find explosions of inspiration for your color and fiber experiments as you learn how to work confidently with multi colored palettes. We have chosen to work with 'rainbows' to do this because of their magical properties and universal appeal. This highly practical guide does not weigh you down with color theory or highly complex blending 'systems' nor does it require you to learn multiple dye techniques in order to be unique with your colors. With our straightforward approach you will be able to create the rich, dynamic colors your soul craves. Through the fiber blending instructions and recipes contained inside, you can explore your own sources of inspiration using a range of fiber tools and preparation methods. We will then show you different ways to work with these multi-colored fibers to create stunning yarns. Using our color management techniques you can make yarns that retain the amazing effects you achieved in your fiber preparations. Customer Reviews

Suzy Brown, aka Woolwench, co-creator of Fiberygoodness.com, brings her background in adult

and distance education to her passion for all things fiber. As 'WoolWench', Suzy has years of experience spinning yarns and teaching workshops. She has created courses for FiberyGoodness and others, including the Online Spinners and Weavers Guild and the New Zealand National Guild "Creative Fibre' (upcoming 2017). Suzy's work is curiosity driven, focussed on the 'art' of 'craft' and deeply rooted in experimentation and exploration. Arlene Thayer, aka SpinArtiste, is a talented and creative spinner, making 'out of the box' yarns with her own unique approach to spinning that gets the best out of everything she has on hand. Arlene has made huge contributions to the fiber artist community with her Spin Artiste online blog and as co-creator of Fiberygoodness.com, Arlene has been instrumental in the development of creativity courses for fiber artists, and in supporting the growth and development of others in this field.

This book is so much more than I expected. Not only is it a beautiful book filled with photographs of everything it talks about it is jam packed with information. The instructions are all written so that a beginning spinner who is just starting to get interested in processing or re-processing fiber will understand. It is a completely accessible resource on everything from basic color theory to the most popular tools to very detailed spinning instructions and even some examples of finished objects. It does focus on rainbows throughout but the information is just as applicable to any other color combination. I definitely would recommend it for those who are just starting to take a look at re-prepping purchased fibers but still need a lot of hand holding. Those who are veterans of fiber prep might not draw too much new information from it but there is always the eye candy throughout. Spinners should note that all the spinning instructions are written for wheel spinning. Spindle users will need to make some adjustments in order to produce the same type of yarn but it is definitely possible in all cases.

Beautiful book! This is a wonderful book. Suzy Brown and Arlene Thayer have done a great job helping people learn more about fiber. There is a lot of practical advice on how to get more out of your tools and problem solving. It has information on color theory and blending. Spinners, Felters and many types of Fiber Artists will enjoy this book. The photography is lovely too.

It's called the Big Book of Fibery Rainbows!!! That's a big promise and this book does deliver! There aren't many spinning fiber preparation books out there, but this one is certainly worth adding to your library. It is very comprehensive, including lots of different techniques. The photos are pretty and inspiring. I'd say the book is especially good for beginners, as a general reference book or those

needing a refresh of skills. Serious experts might not find any advanced content here.

Excellent explanations and illustrations in this cheerful book. I find myself returning to it over and over.

Thank you for the quick arrival of this interesting book

Beautiful, inspirational book - love it.

this book is a piece of art unto itself, while also allowing fiber art to be pursued. The people at Fibery Goodness always put forth quality work and this book is not exception. A must have for any fiber artist interested in blending colors to make gorgeous yarn.

Great book
