Instructional Strategies For Braille Literacy

Synopsis

Winner! 2000 C. Warren Bledsoe Award-The Association for Education and Rehabilitation of the Blind and Visually Impaired (AER). Best New Professional/ Scholarly Book in Nursing & Allied Health-Association of American Publishers (AAP). This award-winning, user-friendly handbook provides instructors with specific creative strategies and methodologies for teaching braille. Intended to help pre-service and in-service teachers develop their instructional literacy and braille skills, this comprehensive manual provides a wealth of information on working with children who have congenital or adventitious visual impairments as well as students with additional disabilities or who are speakers of English as a second language. Resources for teachers and effective techniques suggested by experienced braille instructors are also included.

Customer Reviews

Edited by Diane P. Wormsley, Ph.D., Coordinator, Education of Children and Youth with Visual and Multiple Impairments Program, Pennsylvania College of Optometry and Frances Mary D'Andrea, M.Ed., Director, National Initiative on Literacy, American Foundation for the Blind, Southeast.

This is a great book if you are trying to teach Braille. It works for small children learning to read for the first time or for adults who have lost their vision. I love, love, love her functional approach. It includes ideas like having a braille rich environment and creating stories together in braille. It gives all the steps you need to provide braille instruction. Through Patterns away - it's boring! This is fun

and custom made for your kids or adults!

Good reference.

This is a great book! I used many of these suggestions when working with my functional academics students. Several of them moved on to their next environments with basic braille skills to help them out. It takes a bit of work to prepare some of the suggestions, but it is well worth it!
