Francis A. Carey is a native of Pennsylvania, educated in the public schools of Philadelphia, at Drexel University (B.S. in chemistry, 1959), and at Penn State (Ph.D. 1963). Following postdoctoral work at Harvard and military service, he was appointed to the chemistry faculty of the University of Virginia in 1966. Prior to retiring in 2000, he regularly taught the two-semester lecture courses in general chemistry and organic chemistry. With his students, Professor Carey has published over forty research papers in synthetic and mechanistic organic chemistry. In addition to this text, he is coauthor (with Robert C. Atkins) of Organic Chemistry: A Brief Course and (with Richard J. Sundberg) of Advanced Organic Chemistry, a two-volume treatment designed for graduate students and advanced undergraduates. He was a member of the Committee of Examiners of The Graduate Record Examination in Chemistry from 1993-2000. Frank and his wife Jill, who is a teacher/director of a preschool and a church organist, are the parents of Andy, Bob, and Bill and the grandparents of Riyadh and Ava. Robert M. Giuliano

This is a terrible text book for ochem. I have read 3 ochem textbooks and klein is my personal favorite. This book did a poor job explaining things.

Book came with a bad binding also lose and have a crack down the binding. Idk how tht was possible but it would of been nicento get a less beat up book

This book came in fast in the mail and is practically brand new saving me hundreds! VERY GOOD PRICE. Thank you.

Reviews in the back of the chapter are very helpful if your professor sucks. It's worth buying as a supplement to lectures and I usually don't buy textbooks.

Not that good for Organic Chemistry. The order of the chapters could be better. Would not recommend this but the Klein Orgo book.

Great price for the book, the book goes very in depth at an easy to read level!

Why create this book when the eighth edition is the same. Waste of money

Worked out perfect
