Climatology

Synopsis

Welcome to the exciting journey of learning about one of the most widely discussed sciences. Praised for its detail and accuracy, Climatology continues to lead as the most comprehensive presentation of our dynamic climate system. The Fourth Edition features a completely revised, full-color art program that enhances clarity and gradation of all maps, climographs, and images to help readers better understand the diversity of climate within varying climate types. The text appeals to all students, as it covers the basics of atmospheric science in the early chapters and provides the breadth and depth of topics to challenge the more experienced reader. Climatology, Fourth Edition aims to improve students' communication skills, encourage critical-thinking, and invoke a sense of social responsibility, making it the clear choice in this rapidly developing science.

Book Information

Paperback: 418 pages

Customer Reviews

Comprehensive for the beginner.

If you are studying or teaching any Climate or Meteorological related subject. this is a must have book! It suits both professionals and amateurs

Book in VERY GOOD condition but VERY CHEAP price :) like it!!

Required text book for my daughter class

My 2nd book I purchased from here! The price was really good and the book looks brand new!! I am very happy with my purchase and look forward to buying books from here in the future.

The book is informative, but it was used for a college course. I do not have a lot of interest in the matter.

I really like this textbook, it is organized well and very informative. There are several topics in this book that are not covered in others. The text is easy to read and follow and contains many useful figures and diagrams. I especially liked Chapters that focused on Climate Change and Variability and Anthropogenic Climatic Changes. This book is structured in a way that makes it ideal for an introductory or advanced Climatology course.

OMG I hate this class!!! I don't even read this book! and it did not tell me a lot. Well.
