Chineasy Memory Game

Synopsis

Learning Chinese is notoriously difficult and has long put off even the most linguistically savvy Westerners until now. ShaoLan has used her entrepreneurial and software background to unpick Chinese characters and create a simple system for quickly understanding the basic building blocks of the written language. Working with renowned illustrator Noma Bar, she has developed a unique set of illustrations that are engaging and delightful and offer a glimpse into the wonder of the Chinese language and culture.

Customer Reviews

It is very interesting the way it worked. I started playing with my 6 yr old boy and after 3 games we were familiar and able to identify more than 80% of the words. I hope there will be on the near future a second set of words.

This is a beautiful set of matching cards, with and without helpful drawings. They also have the pinyin on the illustrated ones.

Awesomeness! My 2nd grader is in a Chinese immersion class at school and this game gives him an opportunity to teach family members some basic characters, which is wonderful for reinforcing what he's learning at school.

Husband loves it

We love this. It is simple to play, yet you are learning at the very same time. Fun!

It is fun to play with kids. I played this game today with a preschool class that has never been exposed to Chinese in any way and they loved it. After a few rounds they were able to look at the character and say what it means in English.

Beautiful product. I really enjoy this method of teaching/learning chinese characters. My daughter loves them!

Excellent condition, great quality content. Love it.
