Synopsis

Safari Guide II is a completely updated work that gives detailed information on all aspects of hunting in the hunting countries of Africa. Whether you are planning your first trip to South Africa or Namibia and want to get insightful information on the who, what, when, or where, or whether you are planning a trip to Ethiopia for an animal such as the mountain nyala, Safari Guide II will clearly show you what to expect-from the preplanning paperwork to the point when you actually start hunting.

Customer Reviews

Having lived overseas many places, except Africa, I respect the detail and realistic advice presented in this book. The authors are so frank about benefits and drawbacks of each area, you are led to trust their recommendations. Of course, still double check anything written with other reputable sources with recent experience "in-country", as things change, but this is a great place to start.

Flack’s work needs updated. Zamibia and Botswana are already closed to hunting. CAR is about as dangerous as can be and no one in their right mind would hunt there.Beyond that it offers solid information.

I purchased this book for my husband as he is planning a hunting trip to Africa. He was narrowing down his ideal hunting area and this book helped him ultimately decide. He was extremely happy with detailed information this book offers and refers to it often! If you want to go to Africa to hunt, purchase Safari Guide II!

Great

I purchased this a few months ago and it is very informative and will be a big help on my great adventure.

I have been to Africa for four hunting safaris to date. I have another booked this year, and I hope to go on many more. I bought this book for planning purposes.The book is well done and is useful. For example, I recently looked into a hunt in Namibia, so I pulled this book off the shelf to read up on the Namibia section. In particular, the chapters "What I've Learned After Three Safaris" and "A Guide to Booking a Safari" will be very useful to the person booking his or her first or second safari. Also, the subchapters on the best places to hunt lion and leopard today were well done.The book is now a few years old and out of date in some regards. For example, there is a reference to no more 100 pound tuskers, but a half dozen or more have been shot in the past three years or so. And, Zimbabwe is now moer stable than it was at the time of the writing, so I suspect it would be described differently. Last, the contributions are from many authors. Inevitably, some of the contributions are better than others.But for the most part, the book is well done and is worth buying and reading. I hope a new and updated edition eventually comes out. If it does, I will buy it also.

This is an outstanding resource for anyone planning or even thinking about going on a hunting safari.
