"A refreshing analysis of race in the Americas." -- Molefi K. Asante

Africans and Native Americans (the book) explores key issues relating to the evolution of racial terminology and European colonialists' perceptions of color, analyzing the development of color classification systems and the specific evolution of key terms such as black, mulatto, and mestizo, which no longer carry their original meanings. Jack Forbes presents strong evidence that Native American and African contacts began in Europe, Africa, and the Caribbean and that Native Americans may have crossed the Atlantic long before Columbus.

Excellent book. Needs to be in the school districts and universities.

This book should be required reading starting with junior high school.
