Dr. Robert J. Marzano is CEO and co-founder of Marzano Research Laboratory, which specializes in school reform efforts to enhance student academic achievement. Over his 40 years in education, the central theme of his work has been translating research and theory into practical programs and tools for teachers and administrators. He is the author of more than 30 books, 150 articles, and more than 100 curriculum guides and related materials for teachers and students.

Marzano is brilliant. He always goes beyond the superficial and trendy to report good and solid research about excellent teaching practices. This book is no different.

Marzano, well known for his Classroom Strategies and "That Works" series brings many of those ideas together in a simplified text organized around key questions all teachers must address.

Marzano continues to provide excellent Action Steps for any educator to take at any level. if you are a Marzano fan, you will still love this book and gain from it. If you are new to Marzano, this is the text I would start with before digging into his Classroom Strategies series.

Terrible formatting, the information is not presented in a clear way.
