Customer Reviews

Grupo SM is the third-largest educational publisher in the Spanish-speaking world. They have sold more than 25 million books worldwide, including primary and secondary textbooks, children's and teen literature, and reference books.

It is exactly as we require for the homeschooling class! We have used this book extensively in completing her class. Thank-you!

excellent

it really works Perfect condition, great I used it often Works well enough. have purchased others that i liked much better I would tell my friend about this, he need one.

If this book were for me, I would gladly review it but I bought it for a friend who plans to take the appropriate tests for becoming a science teacher in high school. I have rated it at one star because I know very little about the book contents and the review will not go through unless I do a rating! Maybe someone needs to add "Don't know" as a category.
