Customer Reviews

Our daughter is studying to take this test & she has always used flash cards or rather note cards, So I am hoping this will help her. Our daughter needed this for the nursing entrance exam & made 100 on math & 96 on a different section the first time she took the test. So I would say this was worth it. This is such a great idea . so much information & being able to have it already on flashcards was wonderful

Didn't help with Anatomy and Physic that well

Too much information on each card so it's hard to remember so much at a time. Also, the cards are on perforated paper and you have to cut them out yourself and they don't come with anything to store them in. I feel like these are cards I could have basically put together myself with all the information there is online or from study guides.

Helpful, but has a lot of information on each care, kindof hard to memorize.

These "flashcards" had way too much information on 1 card. They basically printed a small looseleaf textbook and perforated the pages into sections. 0 stars. Useless for flashcards.

An essential tool for studying to take the exam! My dad and I are using the Leitner method described on the product to burn in subject matter I struggle to retain. The separate card decks are great, giving me an idea of where I am in my preparation and help me with what I have to study and research more.

He loved them--helped him pass!

This product went above and beyond my expectations. I am pleased and feel that I am much more

prepared for the test!
