Customer Reviews

Mosby's Pharmacology Memory NoteCards: Visual, Mnemonic, and Memory Aids for Nurses, 3rd Edition is a colorfully illustrated collection of spiral-bound cards that brings together the difficult drugs and topics related to pharmacology into one portable volume. Using a wide variety of learning aids, humor, illustrations, and mnemonics, this valuable tool helps your nursing students master pharmacology in class, in clinicals, and in preparation for the NCLEX® examination. Specific topics include: administration, antibiotics/antivirals, anticoagulants, cardiac drugs, CNS drugs, diuretics, endocrine drugs, GI drugs, musculoskeletal drugs, pain drugs, psychiatric drugs, pulmonary drugs, and reproductive/OB drugs.

These note cards have helpful mnemonics that make learning pharmacology a breeze. Medications are classified by category, and especially important info (such as adverse reactions, and drug interactions) are highlighted in a different color to make the info easily stand out. The cartoons make it easier to remember the info as well, because sometimes the silliest associations are the easiest to recall. I recommend this to nursing students taking pharmacology because it makes the memorization just a little more fun, simple, and easy to understand.

Good quality, tell you the highlights, although some small details and some drugs are missing, in my opinion. I'm a student nurse who just took my pharmacology course and had the WORST TIME OF MY SCHOOL LIFE. Although I did not use it nearly as much as I should have, I still think it's something good to own for now, as a student.

Super helpful in memorizing all the drugs! Pharmacology seemed not doable but these notecards made a huge difference.

After reviewing the material ONLY 3 times in less than 24 hours to prepare for the HESI, I'd say this is the best thing that's ever been created!Helped me pass my exam, so I would definitely recommend all Nursing students to buy this product!The images are great, makes sense, and stick.All relevant information about the drugs, (mechanism, contraindications, etc.,) is listed.

this is a great study guide. i used this all the time in pharmacology

good information, great additional resource.

So helpful if you are a visual learner!

pictures need to be simplified, missing some important drugs
