Customer Reviews

Grade 3-6-- The 20th entry in the series. With his usual step-by-step approach, Ames invites readers to copy insects, spiders, and mollusks. As with the other books, no information about these animals is presented, not even their actual sizes, which may lead readers to perceive nature incorrectly. Ames's successful technique for introducing mimicry, which he states "is prerequisite to creativity," has been adapted and expanded by others such as Don Bolognese, who adds information, perspective, and color to complete his step-by-step approach in *The Way to Draw and Color Dinosaurs* (Random, 1991). Beginning artists who find comfort in Ames's easily replicated technique will be attracted to this title. --Carole D. Fiore, State Library of Florida, Tallahassee

Draw 50 Creepy Crawlies will show aspiring artists how to draw a variety of insects, spiders and other crawling creatures.

This book will get both the young and old, experienced and not drawing all sorts of creepy

creatures. I like the Draw 50 series, some books more than others and this is one of the best. It follows the Draw 50 format of a text intro and then many pages of step-by-step projects. It can be easily followed. I'd rate it for ages 8 and up. It is a great way to get started with drawing. You need to start somewhere and this book almost guarantees good results. While you are following the directions, you are also learning about building up shapes, etc. Even for the non-beginner, this is a good reference book. Sometimes, I am more in the mood for playing with colour (coloured pencils, watercolour, etc.) and this helps get the drawing done well, when one doesn't feel like fussing. That can help unlock artist's block, too. Overall, it's full of basic, good lessons.

I got this book for my Grandson who loves bugs and likes drawing. We each drew bugs from the book and were surprised how easy it was to draw something with such detail and be so realistic. It was a nice break from all the electronic toys! Draw 50 Creepy Crawlies

Needed this book to replace a lost library book. Book was in perfect condition and the librarian accepted it as a replacement instead of having to buy the book from them at retail price.

My children love the Draw 50 method, and this one was a wonderful addition to our collection. It teaches kids how to outline their drawings to ensure accuracy which gives students the confidence they need to progress in their art.

My 5 year old son, who shows no particular artistic talent, enjoyed this book because he loves bugs. Even though this book is designed for older kids, he did a fair job drawing the crawlies. I uploaded two of his best work above. He gets no adult help.

This type of book is useful in teaching beginning ELLs because the language the teacher uses in talking about drawing is adjusted to the needs of the student. ELLs of all ages enjoy this book as a supplement to teaching a unit on Bugs and Tiny Animals.
