Tumescent Local Anesthesia

Synopsis

This method of local anaesthesia, developed by a dermatologist and a pharmacologist, is presented to demonstrate its use in cosmetic liposuction and other procedures. Richly illustrated to show details of the technique and with serial photographs of many clinical cases, the book explains the advantages of this new technique and provides practical instruction in how to perform it.

Customer Reviews

Since the introduction of Tumescant Local Anesthesia by Dermatologist and Pharmacologist J.A. Klein, this method of subcutaneous infiltration of large volumes of diluted anesthetic has been more rapidly adopted by doctors all over the world than any other anesthetic method before. Initially invented for cosmetic liposuction, the unsurpassed safety of the procedure has led to many new indications. Today, the advantages are used by dermatologists, general surgeons and plastic surgeons, gynecologists, phlebologists, and ENT specialists. The book contains a wealth of original work and for the first time gives detailed information, clinical examples and tips & tricks on: Medical issues such as liposuction, extirpation of lipomas, wide excision, dermabrasion, flaps and grafts, split skin grafting, hyperhidrosis, acne inversa, breast surgery, sentinel lymph node biopsy. Cosmetic surgery is also covered: abdominoplasty, medial thigh lift, face lift, laser skin resurfacing, hair restoration surgery. Special emphasis was laid on all aspects of phlebologic surgery in tumescent local anesthesia. All contributions were made by internationally renowned experts in their field, such as dermatology, anesthesiology, plastic surgery, general surgery, phlebology,

gynecology. The brief but thorough theoretical introduction covers up-to-date background information on pharmacology and technique and makes this book an ideal companion for all courses on the subject.

contains a lot of good information, which is more difficult to access due to the lack of an index.

Whoever heard of a 210 page textbook with no index?
