Customer Reviews

I used to see advertisements for FUE and other hair transplant techniques but didn't know what they really are. This book gave me a clear perspective on different hair transplant techniques as well as different proven medicine to prevent hair loss. I also got in depth knowledge of how hair grow and why they fall. I fully recommend this book.

A lot of good information on hair loss and restoration. Unfortunately all restoration techniques

requires a professional. Only two home treatments were recommended (over the counter), so telling me to go try those already widely-known drugs was nothing new. And telling me to go try this drug but it takes 6 months to 2 years before results may happen is certainly a leap of faith. None of these drugs are cheap, so if you go that route expect to spend a LOT over a very long period of time for something that may prove ineffective. If you want to try the professional route there are several options covered with some good recommendations though. This of course is an expensive route, so it just depends what you're looking for.

Both my husband and I have thinning hair, although he is very sensitive talking about it. I took the initiative to buy this book and see what our options were. I was very happy with the information presented. It was easy to understand and multiple options were discussed from over the counter medications to hair transplants to wigs. I got the sense that they tried to cover everything that is out there that isn't a gimmick. The focus wasn't entirely on men's balding, which as a woman I appreciated. Now that I know what the options are, the next part is how to get my husband to go see a doctor about it!

I have been searching for viable information on hair loss for my husband. I finally found it! After reading this book written by actual Physicians who specialize in this area, I had the information I needed. I have now made an appointment to see them and feel very well informed and my husband is comfortable with the whole process now! Thank you so much for the information and we are looking forward to the procedure and outcome!
