Customer Reviews

Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

This brochure type guide is not the most detailed, but if you are in a boat or on a dock next to water, this waterproof guide is a quick way to make general identifications of the common birds in the

South Florida Area. Clear pictures with names and general markings this guide enables the beginning birder to do a general identification, so later they can look up for more detail using other more detailed field guides. I personally use them for prep before an outing. Clear, easy to use, and having the ability to resist water these brochure guides are a gateway to bigger better guides. Fun to use for kids, too!!

Just the thing for easy carrying to the many wildlife preserves on the west coast of Florida. We saw all of the big birds on the back cover, except the flamingo.

nice

We just moved to this area and needed a simple and quick way to id the many birds by us. Though simple and quick if I or my family want to learn more, now they have a name.
