Horizons: Exploring The Universe

Synopsis

The 13th Edition of HORIZONS means the proven Seeds/Backman approach and trusted content, fully updated with the latest discoveries and resources to meet the needs of today's diverse students.

Book Information

Paperback: 488 pages

Publisher: Brooks Cole; 13 edition (January 1, 2013)

Language: English

ISBN-10: 1133610633

ISBN-13: 978-1133610632

Product Dimensions: 1 x 8.8 x 10.8 inches

Shipping Weight: 2.9 pounds (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars 18 customer reviews

Best Sellers Rank: #23,125 in Books (See Top 100 in Books) #35 in Books > Textbooks >

Customer Reviews

Mike Seeds was a professor of physics and astronomy at Franklin and Marshall College in Lancaster, Pennsylvania, from 1970 until his retirement in 2001. In 1989 he received F&M College's Lindback Award for Distinguished Teaching. Mike's love for the history of astronomy led him to create upper-level courses on archaeoastronomy and on the Copernican Revolution ("Changing Concepts of the Universe"). His research interests focused on variable stars and automation of astronomical telescopes. Mike is coauthor with Dana Backman of Horizons: Exploring the Universe, 12th edition (2012); Universe: Solar Systems, Stars, and Galaxies, 7th edition (2012); Stars and Galaxies, 8th edition (2013); The Solar System, 8th edition (2013); and ASTRO, 2nd edition (2013), all published by Cengage. He was senior consultant for creation of the 20-episode telecourse accompanying his book Horizons: Exploring the Universe. Dana Backman taught in the physics and astronomy department at Franklin and Marshall College in Lancaster, Pennsylvania, from 1991 until 2003. He invented and taught a course titled "Life in the Universe" in F&M's interdisciplinary Foundations program. Dana now teaches introductory Solar System astronomy at Santa Clara University and introductory astronomy, astrobiology, and cosmology courses in Stanford University's Continuing Studies Program. His research interests focus on infrared observations of

planet formation, models of debris disks around nearby stars, and evolution of the solar system's Kuiper belt. Dana is employed by the SETI Institute in Mountain View, California, as director of education and public outreach for SOFIA (the Stratospheric Observatory for Infrared Astronomy) at NASA's Ames Research Center. Dana is coauthor with Mike Seeds of Horizons: Exploring the Universe, 14th edition (2018); Universe: Solar Systems, Stars, and Galaxies, 7th edition (2012); Stars and Galaxies, 8th edition (2013); The Solar System, 8th edition (2013); and ASTRO, 2nd edition (2013), all published by Cengage.

Easy to read, helped me get an A!

I have really enjoyed reading and learning with this book! It is well formatted, with much useful (and interesting/relevant) information. I especially like the layout of the picture amongst the text, and the large two-page spreads throughout the book. My only wish is that the book might have been offered in hardback, or with a slightly sturdier spine. With its size and length, the text is a bit difficult to handle with the glossy, "floppy" pages and spine it currently has.

Pleased with my purchase, it was better than the description.

Great Thanks

Exactly what I needed. Was a good read (when I read it). I am not a science major but it was still entertaining enough.

Excellent condition!

Great, thanks!

It's exactly what I needed
