Critical Care Of The Stroke Patient (Cambridge Medicine (Hardcover))

Synopsis

New and ground-breaking therapeutic options for the critical care of patients with cerebrovascular disease have improved patient management, minimized morbidity, reduced in-patient care, improved quality of life, and had a positive economic impact on health service provision. This volume integrates these approaches and suggests the best therapy option for all cerebrovascular conditions. The early chapters of the book focus on monitoring techniques and interventions. Subsequent sections address the critical care of a wide range of cerebrovascular diseases: ischemic stroke, intracranial hemorrhage, subarachnoid hemorrhage, arteriovenous malformations, cerebral venous thrombosis, and traumatic injury. The editors and authors are internationally recognized experts in their field, and the text is supplemented by tables and illustrations to demonstrate important clinical findings. This book will meet the needs of stroke physicians, neurologists, neurosurgeons, neurointensivists, and interventional neuroradiologists seeking to maximize positive outcomes for their patients.

Book Information

Series: Cambridge Medicine (Hardcover)

Customer Reviews

"This book provides ample evidence of the opportunities and challenges associated with treatment of a difficult patient group. International perspectives and important contemporary data are presented in a detailed but readable fashion." Doody's Reviews
"This book offers much that is new, as we mention above, and the material is presented very systematically in its 36 chapters." Biz India

Internationally-recognized experts present new and established therapeutic options for the critical care of patients with a wide-range of cerebrovascular diseases: ischemic stroke, intracranial hemorrhage, subarachnoid hemorrhage, arteriovenous malformations, cerebral venous thrombosis, and traumatic injury. Valuable reading for stroke physicians, neurologists, neurosurgeons, neurointensivists, and interventional neuroradiologists seeking to maximize patient recovery.

i like it

Excellent review of specialized care for critically ill patient with stroke! Authors are leaders in the area and highly respected so their expertise is appreciated and is needed ! am looking forward to their next book!
