Series: Getting to Know the World's Greatest Inventors and Scientists

Paperback: 32 pages

Publisher: Childrens Pr (September 2010)

Language: English

ISBN-10: 0531223531

ISBN-13: 978-0531223536

Product Dimensions: 0.2 x 7.8 x 9.5 inches

Shipping Weight: 3.2 ounces (View shipping rates and policies)

Average Customer Review: 4.4 out of 5 stars 4 customer reviews

Best Sellers Rank: #540,989 in Books (See Top 100 in Books) #218 in Books > Children's Books > Education & Reference > Science Studies > Astronomy & Space > Aeronautics & Space #341 in Books > Children's Books > Biographies > Science & Technology #7040 in Books > Children's Books > Science, Nature & How It Works

Age Range: 7 - 9 years

Grade Level: 1 - 4

Customer Reviews

The books in this series are all great! If you try to research many of the inventors and scientists in the series based on articles on the internet, you'll find that they are frequently written on a level well above what an elementary school student can understand. This is particularly true of Luis Alvarez. These books are well-written, include fun illustrations, pictures, and cartoons, and are easy to understand for children. I would say they are on a 3rd-5th grade level, and they are about the right length to cover the basics without becoming tiresome for kids. Well done!

I got this for my 1st grader, we were studying Wright Bros, he found this story boring, so we moved on to other stories and I will keep this for when he gets a little older.

thanks!

We've borrowed several books on the Wright brothers from the library and this is the one my four year old son asks for over and over again. It contains many historical details, but the writing is simple enough for him to understand. The illustrations are a combination of historical photographs and some vaguely humorous cartoon style illustrations. A note to parents of younger children, many pages are half filled with text, but it's in a nice, easy to read larger font. Half a page is (very roughly) about 80 words. My son loves books in general and has the patience for a longer story, so he's happy to sit quietly, devouring every word. And I will confess that as a Mom, I am also partial to this version because pays tribute to the role that their Mom's handy/crafty nature (she often made furniture, toys, and clothes) had in their cultivating their inventiveness. If your child is plane obsessed like mine I think they'll enjoy this book.
