Synopsis

The Richard Perkins warship identification albums form one of the most detailed studies ever undertaken of the changes to the appearance of Royal Navy ships. In collaboration with the National Maritime Museum, the publication of this monumental work in a superbly produced multi-volume edition captures all the qualities of the original. Every page is reproduced at full size, making the extensive hand-written annotation readable, while the fine-line drawings retain all the colors that Perkins used to denote appearance differences and alterations.This second part includes most of the smaller cruisers from about 1916 back to the -class corvettes of 1865.
