Math For Everyone: 7th Grade Math

Synopsis

Tired of ten pound math textbooks? Tired of math textbooks with 700 to 1,000 pages? Tired of massive student failure in gatekeeper math courses like Algebra I? Tired of math phobic students (and their parents) exclaiming, "I hate math!"? Maybe it is time to try a different curriculum. Math For Everyone is a curriculum designed to promote massive student (and teacher) math success. Each year's content in the six math courses (7th Grade Math, Algebra I, Geometry I, Algebra II, Math Analysis and Calculus) is boiled down into its essential vocabulary and 5-7 key concepts with particular attention paid to clarity and articulation between courses. Assessment includes old favorites as well as authentic assessment with rubrics and grading advice included. No text is longer than 80 pages as the 5-7 key concepts can be amply demonstrated and practiced in this amount of space. Math For Everyone is not only great for new math teachers and struggling math students, but great for everyone. Nathaniel Max Rock is an educator since 2001 and the author of more than a dozen education books. He has taught the following courses: 7th Grade Math, Algebra I, Geometry I, Algebra II, Math Analysis, Calculus, as well as California High School Exit Exam (CAHSEE) Prep Classes, AVID Elective (9th & 10th grade), and Carnegie Computer classes. Max's authoring topics include math, education and religion.

Book Information

Series: Math for Everyone

Paperback: 80 pages

Publisher: Nathaniel Max Rock (January 1, 2007)

Language: English

ISBN-10: 1599800012

ISBN-13: 978-1599800011

Product Dimensions: 8.3 x 0.2 x 11 inches

Shipping Weight: 7.2 ounces

Average Customer Review: 1.0 out of 5 stars 1 customer review

Best Sellers Rank: #9,125,223 in Books (See Top 100 in Books) #50 in Books > Teens >

Customer Reviews

This purchase was the only time I have bought math curriculum without actually being able to look through the book first. I was so intrigued by the idea that level 7 math could be simplified enough to actually teach a child what they need to know in less than 80 pages, that I ordered this book "sight

unseen". I am very disappointed in this book. It may be fine for a math teacher who wants to teach the necessary procedures without the aid of curriculum and let someone else explain (in long, boring monologue) the concepts behind them, but I'm not a math teacher. As a result of starting this book, my son is more frightened of math than ever, and I am scurrying to find a replacement. A waste of time and money, neither of which I have in abundance.
