needed for academic success

Got this for my mom. She is going back to get her GED after 35 years of being out of school. She is having to learn the basics all over again, so I'm working with her when I can. I needed something that would give her plenty of practice problems, and I think this book is really helping. It gives an example on each page, and then tons of practice problems.

Great study book: touches major topics yet without too many exercises for each subject.
