ISCI™2017: INFORMATION SECURITY IN CRITICAL INFRASTRUCTURES: Collective Monograph

Synopsis

The proposed monograph studies the problems of information security in critical infrastructures. One of the principal aims of this book is to present some results showing the relevance of the problem, as well as possible events and actions that could create a topic for further discussion and considerations in this area. The monograph's topic is extremely important because the information security in critical infrastructures in the modern world affects strongly the globalization processes involving the economies of all countries.
