Cardiac Catheterization Handbook, 6e

Synopsis

This unique, easy-to-access handbook returns with enhanced coverage and clear instructions on what to expect, what to avoid, and how to manage complications in the cath lab. Ideal for cardiologists who need a quick clinical primer on cardiac catheterization, it offers easy access to information on the latest diagnostic and treatment advances necessary for optimal patient care. Straightforward, easy-to-understand approach and pocket-sized format are ideal for reference on the go. Covers vascular closure devices, radial artery catheterization, congenital heart disease, and drug-coated, carotid, and renal stenting. Focused update covers treatment protocols for every procedure you'll encounter, as well as the latest knowledge and clinical trials regarding recent scientific breakthroughs. Highlights the newest catheterization techniques, including new-generation stents, guidance devices, and closure devices, to ensure you're completely up to date. Discusses the management of common patient problems, focusing on cautions and outcomes to help you make informed decisions. Includes discussions on structural heart disease and new developments in heart valve disease. Brand-new illustrations – 40 in total – enhance your visual understanding of the material. Detailed videos of Dr. Kern demonstrating various procedures in the cath lab are linked within the chapters on Expert Consult, which will be regularly updated as new videos are created. Expert Consult eBook version included with purchase. This enhanced eBook experience allows you to search all of the text, figures, videos, images, and references from the book on a variety of devices.

Morton J. Kern, MD, FSCAI, FAHA, FACC, Professor de Medicina da Universidade da CalifÃ rnia, Irvine, Orange, CalifÃ rnia; Chief of Medicine, Health Care System Veterans Long Beach, Long Beach, CalifÃ rnia;Paul Sorajja, MD, Diretor do Centro de VÃ¡lvula e estrutural doenÃ§a cardÃ-aca, Minneapolis Instituto do CoraÃ§Ã£o, Hospital Abbott Northwestern, Minneapolis, MinnesotaMichael J Lim, MD, Co-Diretor do Comprehensive Cardiovascular Care (C4), Director da DivisÃ£o de Cardiologia, Professor de Medicina Interna, Jack Ford Shelby Professor Endowed em Cardiologia, Diretor, cateterismo cardÃ-aco laboratÃ rio, Diretor, DoenÃ§as Cardiovasculares e Interventional DoenÃ§as cardiovasculares Fellowship Programas, escola de Medicina da Universidade de Saint Louis, St. Louis, Missouri

Im a first year fellow so I have a lot of different review books on different cardiology topics... My echo books are poorly written... This one is so completely clear and easy to read with the absolute best pictures and explanations!!! And my interventional cardiology attending (who is quite well-known in her own right and highly experienced) has taught me the same exact things of the top of her head... So I believe this book will give you a great foundation and thorough review of cath from my point of view as a cardiology fellow

If you are a nurse interested in the Cath Lab or learning more about what is done in the Cath Lab this book is absolutely awesome. I had a Cath Lab nurse recommend this book and it talks about the procedures performed and gives step by step guidance on what to expect. It also talks about the heart and has lots of pictures to explain what is being done and the different vessels. It really is an awesome book if you are just starting out or if you are a seasoned nurse who wants to learn more.

Very good info, pretty much all you need to know to be in the cath lab.

Nicely illustrated...takes you through all the basics and more:)

Quick guide.good info

Good resource for anyone in the Cath Lab environment.

Exactly as described

Very helpful to my reference.
