Product Dimensions: 7 x 4.5 x 0.3 inches

Shipping Weight: 1.6 ounces

Average Customer Review: 4.6 out of 5 stars 3 customer reviews

Best Sellers Rank: #2,389,008 in Books (See Top 100 in Books) #98 in Books > Teens > Education & Reference > Science & Technology > Astronomy

Customer Reviews

Was fortunate enough to see Venus brightly shining above the crescent moon the other night - which sparked kids' interest in sky-watching. This book was the perfect night sky watching guide! It has great charts for spotting constellations, no matter which hemisphere or month of the year - brighter stars are shown larger on the charts, so it's easy to see which ones to look for first. Also includes moon phases, when and where to look for planets. And the book is small enough to fit in your (bigish) pocket for outdoors, or for holding with one hand as you shine a flashlight on it in the dark while sky watching.

Great book. Wished it was more up to date. Didn't realize how long ago it was written.

Our kids are studying the stars and universe this year. I looked this book over when it arrived, and I have no doubt that I will be using it a lot. Very informative .
