Customer Reviews

NATIONAL GEOGRAPHIC KIDS inspires young adventurers to explore the world through award-winning magazines, books, website, apps, games, toys, television series and events and is the only kids brand with a world-class scientific organization at its core.

My son loves his NatGeo books. He is constantly reciting fun facts and incorporating them into his homework. I love hearing him use his knowledge from these books in daily life either directly or through comparisons and logic.

It's kind of short, but it's priced appropriately for the size. Great little book with fun facts that the

family can enjoy.

I got this for my nephew who is 7 years old. He loves it! I find it makes him even more curious about the world around him. What I do to ensure that he really benefits from it is that we go online and get more details about some of interesting facts. It's a great gift and I will probably be buying more for my other little nephews and nieces!

I bought this for my 8-year-old as a gift. He requested this specifically as he had a previous version and really loved it. He is very intelligent and is really into science and learning. I think this would be interesting for any kid who is into fun facts and learning.

How often do you get asked, why . . . ? what. . . ? My kids love to read out loud, good practice and the book also is a catalyst for other conversations.

As an adult I don't get this book - bunch of colorful pics and some weird facts, but its the rage. Kids took this to school and I heard about how all the other kids were so excited a NEW weird but true was out. Apparently there is now a waiting list at school to read the book! So, all in all its a winner.

At a quick glance I can tell the neighbor kids will love this, reading alone or with a friend or adult. Beautiful color photos! Can't wait until Christmas morning to share these :)

as promised - item & delivery
