# Law Between Buildings: Emergent Global Perspectives In Urban Law (Juris Diversitas)

## Synopsis

The rich field of urban law has thus far lacked a holistic and concerted scholarly focus on comparative and global perspectives. This work offers new inroads into the global and comparative streams within urban law by presenting emerging frameworks and approaches to topics ranging from urban housing and land use to legal informality and consumer financial protection. The volume brings together a group of international urban legal scholars to highlight emergent global, interdisciplinary perspectives within the field of urban law, particularly as they have import for comparative legal analysis. The book presents a timely addition to the literature given the urgent legal issues that continue to surface in an age of rapid urbanization and globalization.
