Biology: Exploring Life Online Activities

Synopsis

Only Biology: Exploring Life integrates textbook, Web, and labs into a dynamic and balanced biology program. Developed in conjunction with a three-year National Science Foundation (NSF) study, Biology: Exploring Life brings the best in content and instructional design to the classroom. The text covers the general high school curriculum, focusing on a few key concepts per chapter and actively engaging students. Each text concept is reinforced with an interactive Online Activity.

Customer Reviews

I won't give this a higher rating than one star because I ordered this CD, I can't open it, and the 800 number doesn't support the questions on the product, just refers you to a cluttered online 'knowledge base' where you are supposed to hunt and pick to find out what's not working.

This DVD is no longer functional. The publisher has discontinued the online link.
